(54) CELL-ACTIVATING COMPOSITION

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a composition useful for preventing and treating cancers and adult diseases by increasing immune activating effects on the deceases.

SOLUTION: This cell-activating composition is obtained by subjecting myelia resulted from incubation of basidiomycete to amylase, and adding to the resultant low-molecular active polysaccharide composition an antioxidant composition and a low-molecular vegetative anti-malignant tumor agent, followed by mixing.

LEGAL STATUS

[Date of request for examination] 10.06.2002

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
